

MRD CAMERA UPGRADES

ICAM BRINGS THE MRD INTO THE 21ST CENTURY

- (1) **High frequency cold fluorescent lighting** has the following benefits:-
 - a) Lower working light levels. 'Natural Colour' balance.
 - b) Prolonged lamp life and reduced power consumption.
 - b) Cooler temperatures for both operator and documents. No light 'flicker'. Negligible I.R. or U.V.
 - c) Better contrast and reduced glare gives improved resolution.
 - d) Fully controllable, using existing MRD light sensor and a digital display.
 - e) Includes diffusers and shutters.
- (2) **Through the lens video document alignment.**
Removes the finder light function and replaces it with constant display of the document on a video monitor. The integral masking and pull through functions remain fully operational.
- (3) **Counter balanced top glass, book cradle and integrated book shuttle.**
This low profile unit provides convenient and gentle book handling with the option of a side to side book shuttle for the single page capture of larger volumes and newspapers.
